## 3. Your Course

<sup>3.4)</sup> Please add any comments you would like to share.

Sometimes the hand-out lab sheets and power points did not contain all of the information I needed for the labs. Especially when labeling things. This class assumes you already know a decent amount, but it was mostly very clear and had good instructions and explanations.

## 9. Final Comment

- <sup>9.1)</sup> The comment box provides a chance to anonymously communicate any specific impressions (either overall impressions or impressions about particular and specific things) to the instructor. Please feel free to write a lot in the comment box since your feedback is probably the single most important way that courses get better from one semester to the next.
- I recommend this professor and her course. She teaches well and the information given is very helpful. Assignments are reasonably easy and this course overall is a genuinely easy course.
- Overall I enjoyed this class. It was not too much work, and I still feel like I learned a lot. The only thing is I think things needed some more clarification sometimes, and it's nice to have feedback on assignments faster than this professor gave. I figure that life just got in the way, but it usually takes a while to get any sort of response or feedback on questions and assignments. In addition, it seemed like there were a lot of mistakes in the slides and handouts, but I still learned a lot of valuable information! I would recommend a fellow BC student to take this class.
