## Comments Report

### 6. Open Response:

6.1) What are the strengths of this course?

- Good course well structured
- I have been able to be really on top of all my work because she provides us with plenty of time and lets us know about each assignment at the beginning of the course.
- In all honesty, there were no strengths that I could point out about the course at this time.
- It is very informative

6.2) What changes would you recommend that would improve this course?

- I really do not have any changes. This class has been amazing, and the professor is very encouraging and appreciative of the work I did. It was very refreshing to get such positive feedback from my submitted assignments.
- I would recommend that there would not be a major project every week to where students are more worried about completing the project with the information she wants. The projects were not only time-consuming, but they defeated the purpose of what the professor was trying to teach, and that is nutrition. I would also recommend that there would be some type of interactive learning tool to help students understand the material and also make students interested in learning more about the material the course provides. Until the professor implements the changes necessary to improve her course, I will not recommend anyone to take this course taught by her.
- N/A
- Not make so many kindergartener level assignments

6.3) Any further, constructive comments?

- Thank you for your nice comments on my assignments! They were very encouraging!
