6. Open Response:

6.1) What are the strengths of this course?

- How easy the material is to understand because he makes it relatable.

- The strength of this course is learning more in depth about the human body.

- They provide extra study time.

- all assignments listed on D2L are very easily navigable. Dr O also does a great job with communicating with his students after class, and returning emails within a timely manner.

6.2) What changes would you recommend that would improve this course?

- I love everything about this course, except when the professor releases his video lectures of what we learned that class period. I do understand why he does it the way he does, but I wish it wasn't the fact of how he does it.

- I would ask that Dr O SLOWS DOWN during lecture! I am hardly ever able to take notes because he zooms through the slide show every single time.

- N/A

6.3) Any further, constructive comments?

- I love everything about this course, this professor is the best option, extremely knowledgeable about the course.

- It's a very difficult class with a lot of information needed in a short amount of time.

- N/A (2 Counts)
