6. Open Response:

6.1) What are the strengths of this course?

- Relatability of the instructor and the way complex learning tasks were broken down so that students could understand the concepts

- The strengths for this course would be to take notes and be sure to write down things he mentions that are not in the PowerPoints. He is pretty good at letting students know when to write it down even if it is not the study material. Also, your attendance reflects your grade. Another big thing is being sure you know when assignments are due. Have a calendar with due dates so you do not miss a quiz or exam.

6.2) What changes would you recommend that would improve this course?

- N/A

6.3) Any further, constructive comments?

- I have no other words besides stating how amazing of a professor Dr. O'Neil is. He makes class interesting even when we are not learning about the most exciting material at that moment. He also always has a story that ties in with what we are learning to help us better understand and remember it. He is by far the best professor I have ever had at Brazosport College. You can tell how much he truly loves his job. I always recommend people to take him for their science related courses. I have took courses with him three times now!
