

Joel Quiros
MICROBIOLOGY (BIOL2320 50231S)

BC Survey - Results 2023 Fall (16-Week - 231S), MICROBIOLOGY (BIOL2320

Dear Instructor,

Below are the 2023 Fall (16-Week - 231S) survey results for "MICROBIOLOGY (BIOL2320 50231S)".

The overall indicator is listed first.

The second part of the analysis lists the average values of all individual questions.

Comments are listed at the report's end.

If you have any further questions, please reach out to a member of PIER.

Best regards,

 No. of responses = 27

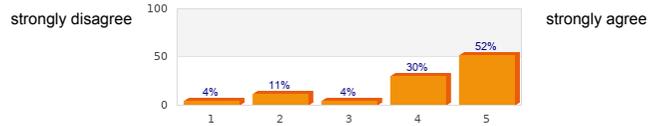

Survey Results

3. Level of Agreeance:

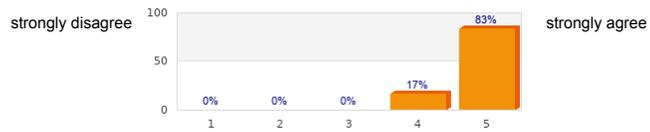

3.1) Instructions for course activities and assignments were clear.	strongly disagree		strongly agree	n=27 av.=4.7 md=5 dev.=0.5
3.2) The workload in this course was well distributed throughout the term.	strongly disagree		strongly agree	n=27 av.=4.2 md=5 dev.=1.1
3.3) The course was delivered as outlined in the syllabus.	strongly disagree		strongly agree	n=27 av.=4.6 md=5 dev.=0.9
3.4) Assessments/exams were based on material covered in assignments, readings, lectures, videos, group activities, etc.	strongly disagree		strongly agree	n=27 av.=4.9 md=5 dev.=0.4
3.5) The instructor made learning relevant to my field of study, career, or degree.	strongly disagree		strongly agree	n=27 av.=4.8 md=5 dev.=0.4
3.6) The instructor used a variety of instructional methods (examples: group discussions, student presentations, student activities, lab activities, online discussions, video assignments, case studies, etc.)	strongly disagree		strongly agree	n=26 av.=4.8 md=5 dev.=0.5
3.7) The instructor provided timely feedback on my assignments.	strongly disagree		strongly agree	n=27 av.=4.4 md=5 dev.=1
3.8) The instructor exhibited professional behavior, treated students respectfully, and used appropriate language during class.	strongly disagree		strongly agree	n=27 av.=4.9 md=5 dev.=0.3

3.9) The instructor provided grades within the stated timeframe.

n=27
av.=4.1
md=5
dev.=1.2

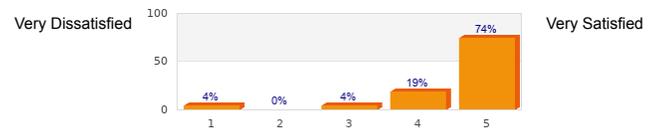

3.10) The instructor was accessible to answer questions and explain material outside of class according to office hours.

n=24
av.=4.8
md=5
dev.=0.4
ab.=2

4. Overall Satisfaction With This Course:

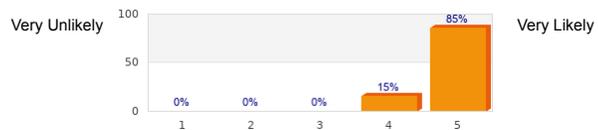

4.1) Please rate your overall satisfaction with the learning experience in this course.

n=27
av.=4.6
md=5
dev.=0.9

5. Course Recommendation:

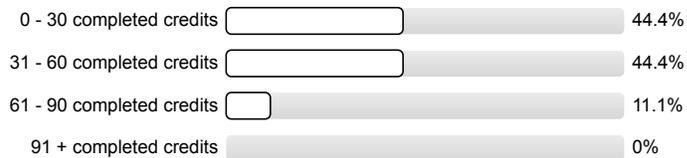

5.1) How likely are you to recommend this course with this instructor to a friend?

n=27
av.=4.9
md=5
dev.=0.4

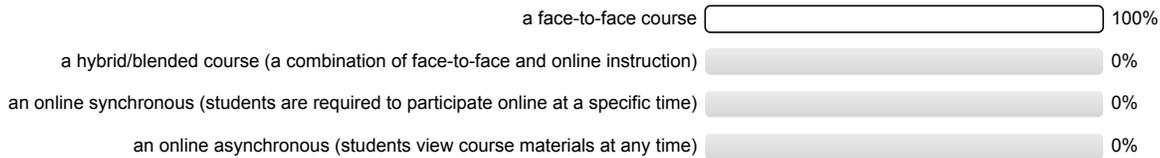

7. Student Demographics:

7.1) How many credits have you completed toward your degree or certificate?

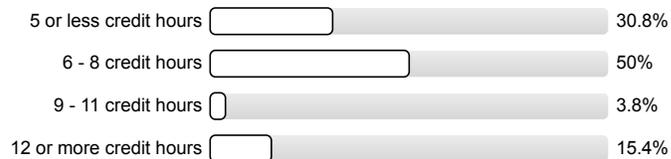

n=27

7.2) This course is instructed as:

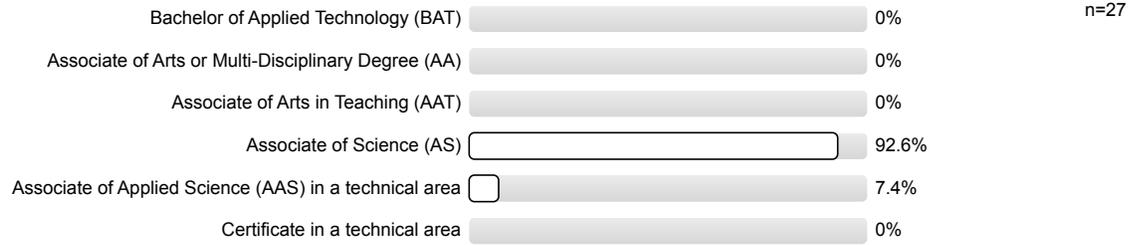

n=27

7.3) This term I am currently enrolled in:

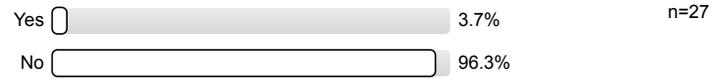

n=26

7.4) My current major is:

7.5) I am currently a high school student taking college courses.

Comments Report

2. More Than One Instructor:

2.1) **If your course had more than one instructor**, in the box type the name of the instructor you are assessing. If your course only had one instructor, skip this question.

- Dr. Quiros
- Joel Quiros (2 Counts)

6. Open Response:

6.1) What are the strengths of this course?

- Amazing professor who engages and you can feel they actually are interested in teaching others. very funny guy with dry humor perfect for a good laugh when everything is serious
- Dr Quiros covers the course information very well and is always available to answer questions. His course outline and calendar are very helpful in keeping track of due dates and coursework. The D2L information is readily available and thorough.
- Dr. Q is great at making sure you understand everything he is trying to teach you.
- Dr. Q made sure that this course was applicable to my nursing degree
- Dr.Q explains things very thoroughly and is always open to any questions the students may have. He works with his students and makes sure what is being taught is also being understood. He provides plenty of extra credit throughout the semester, but it is up to the student to talk full advantage of it.
- Everything we learn is information we can use in future nursing programs.
- He is a great instructor, he goes over the material thoroughly and makes it as easy as possible to actually learn the information he is teaching.
- I did a lot in this class, even information that helps me in my current career. I didn't think, after taking biology and not really liking it, that I would love this course as much as did. I wish I had more time to dedicate to studying and learning more.
- I have heard prior that Microbiology was a tough course and Biology was never my favorite subject so I thought I was going to suffer in this class. I made the best decision to take Dr.Quiros in person class even though I have to commute 2x a week from Houston. He has made this class more than enjoyable, and has made me really like microbiology, and I even thought about being a lab tech for a bit because I enjoyed everything that went with it. I can see now that I wasn't horrible at Biology, I just did not have the proper guidance. I wish I could take Dr.Quiros for all my classes.
- I love how Dr.Quiros sets up his class based on his syllabus and it makes it easier on the students
- I was told that since I did not take the BIOL pre-req for this class, I would do poorly and that the students in my class would do better than me. I did not share this with my instructor. I've done better in this class than several of my co-students. Dr. Quiros is amazing at explaining difficult topics. He uses different voices, compares difficult topics to topics more easily understood, provides materials needed and doesn't include extra "fluff". I honestly do not believe I would have done as well in this class if I had a different instructor.
- Instructor provides clear informations in lectures that correlates with the test material precisely.
- Test and review material were close to testing and exam guides, as well as SI leader, helped
- The information was clear and presented to students easily. The exams were over this information and not trick questions.
- The material was explained very well.
- The professors overall class set up was good and easy to follow. I really enjoyed his class. Awesome professor
- The strengths of this course are understanding the depths of what all bacteria do and having a professor who is pretty flexible and understanding and who is able to review the material again if needed.
- There are tools accessible for students to enhance their learning such as PowerPoint presentations, videos, and practice exercises. Also having an instructor who responds timely to my emails is helpful.
- This course promoted inquiry, critical thinking, and team work. The course examined a considerable amount of information; Dr. Quiros always presented it in an engaging way that made the material feel easier to learn and retain.

- Very informative and can be applied to real life.
- detailed information.
- great professor

6.2) What changes would you recommend that would improve this course?

- Assignments could be more evenly dispersed through the semester. Managing several big assignments such as essays, power point presentations, and studying for exams was challenging at times during the semester when everything would be due in the same week. Allowing students a more appropriate amount of time to complete assignments would be more conducive to success.
- I can't think of any off the top of my head.
- I don't I would change anything at all. I really enjoyed this class and Dr. Quiros is an amazing instructor!
- I enjoyed this course and do not believe it needs any improvement.
- I would change the assignments being spaced out when it comes to papers and presentations
- I wouldnt change the course i thought it was pretty laid back and straight forward
- N/A
- No changes needed
- No changes needed.
- Scheduling the class for it to be manageable.
- The course was taught well and provided interesting information which made it enjoyable considering it isn't my favorite subject of the sciences. Not sure I can offer much feedback on how to improve the course. I thought it flowed well.
- The disease paper does not make a lot of sense when done in the beginning of the term after we discuss the diseases and antibiotics I realized my paper was not written well. Maybe push that paper to the end of the semester so it makes more sense to the students. The work seems overwhelm when paired with the lab to this lecture, maybe cut back on some of the outside of class assignments. I do not take online classes because I do not have all the extra time outside of the class.
- This is no reflection of the instructor or the science department at all but I do wish this class was even 30 minutes longer each class. We spend more time in lab than we do lecture but I feel emphasis should be placed on lecture as it is lecture that propels us further into our programs and future employment.
- Too many separate projects considering there is projects with the lab too.
- better resources
- no changes.
- none (3 Counts)
- none at this time.
- spread out the information between tests. Learning so much information at a given time makes it hard to actually learn material.
- the only changes i would make would be to to have the materials and writing as well as exams a little more spaced out so we can focus and actually give our full attention to the next material but overall it wasnt the worse load of work put on me but i think itd be more manageable.

6.3) Any further, constructive comments?

- Dr. Quiros was one of the best professors I've had. He was always friendly, attentive, and helpful. He made microbiology interesting. Even though lab was a lot of work, because of him I looked forward to going and learning new information. Hopefully Ms. Tobola can work with him to make some of the assignments and deadlines more manageable for students.
- Great job this semester! You had too many classes and I hope you can get a less stressful semester.
- He is a great teacher.
- I do wish grades would coem out sonne rbut you hav eto understand that he teacher like 5 other classes maybe just for your sake dont make them all due the same week. I feel that Dr.Q overworks himself at times

- Keep being a great professor.
- Keep doing what you're doing, I really and truly enjoyed taking your courses this semester!
- No further comments
- No, I think this professor is very professional and helpful in this course.
- None
- None, he makes everything relatable, and even shows us how we can apply what we are learning in real life.
- Overall I really liked this class and felt like it was very informative and think it will really help me in my chosen profession.
- n/a
