## Comments Report

### 6. Open Response:

6.1) What are the strengths of this course?

- I believe the attitude and funny examples used when trying to example something.
- N/A
- Prof. Fan responded to questions outside of the classroom very quickly and was will to work with inaccurate grades given by the Aleks homework and quiz platform.
- The workload was not unmanageable and even with 6 other classes I was able to find time to do assignments.

6.2) What changes would you recommend that would improve this course?

- I would change from the Aleks platform as it is not a good learning tool. Somehow incorporate bonus problems.
- Making sure the students understand everything because if we don't understand what's the point of teaching.
- N/A
- Try making your own materials so that errors will not be as common and it might end up being more interesting.

6.3) Any further, constructive comments?

- I believe what will work best for everyone understanding is slowing down and making sure the students understand everything before moving onto the next topic of the lecture. Along with a more caring attitude and outlook when a student ask a question because it could just be that don't understand something simple.
- N/A
- Using Aleks/McGraw-Hill as an instructional component/means to do homework was a poor choice.
