dev.=0.5

7. Student Demographics:

7.1) How many credits have you completed toward your degree or certificate?

n=5

7.2) This course is instructed as:

a face-to-face course 100%

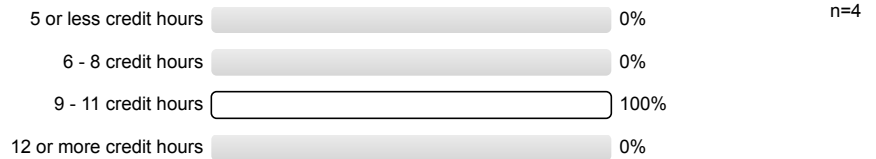

a hybrid/blended course (a combination of face-to-face and online instruction) 0%

an online synchronous (students are required to participate online at a specific time) 0%

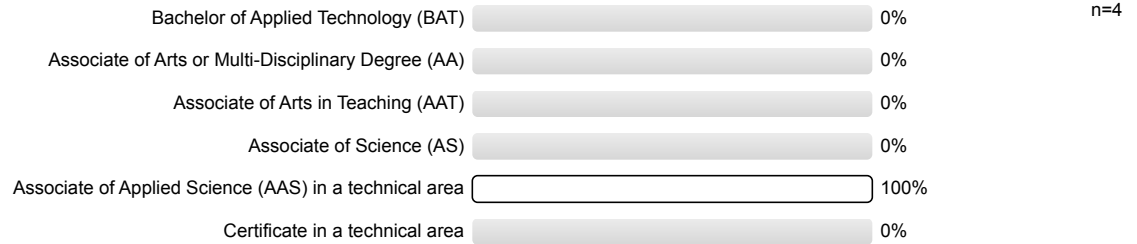

an online asynchronous (students view course materials at any time) 0%

n=4

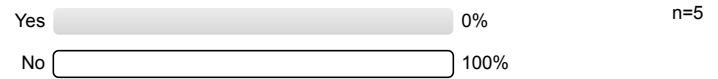

7.3) This term I am currently enrolled in:

7.4) My current major is:

7.5) I am currently a high school student taking college courses.

Comments Report

6. Open Response:

6.1) What are the strengths of this course?

- Hands on training, Troubleshooting, In depth lectures to explain modules.
- The strengths of this course are that it dives into motors and transformers more in depth, we get to have a substantial amount of hands on time working with several different types of transformers and motors. The course is outlined in a manner in which for myself was basically perfect. The modules we covered are important factors in the electrical field. I was able to have plenty of time to where I was able to learn and comprehend what was being taught in the modules. If I had any questions there was plenty of time to break the issue at hand down and into parts to where I would get one on one time with the instructor if needed. I did not feel overwhelmed with the course load. This course outline was balanced perfectly.
- hands on exercises
- professor is very passionate and helpful. instruction is clear and fun

6.2) What changes would you recommend that would improve this course?

- N/A
- There was nothing that caught my attention enough to change something in the course.
- This class could improve on some things but not enough to recommend overall well balanced class
- more up to date technology for the industry

6.3) Any further, constructive comments?

- In my opinion I feel that this course is the way that all courses should be as far as coursework. It was not overwhelming but there was plenty of information to take in. I would leave it as is.
- very well-structured class, teacher deserves a raise.
