6. Open Response:

6.1) What are the strengths of this course?

- Our instructor is always available to help, they offer zoom calls weekly and respond to emails quickly to assist us with anything we are having trouble with.

- The textbook is knowledgeable and a great intro into cloud computing as far as the reading goes.

- Understanding the course material, and going over the instructions very carefully making sure I understand what the instructions want me to do.

- Very clear what needs to be done, and instructor is readily available.

6.2) What changes would you recommend that would improve this course?

- I wish this class was more of a hybrid class so that we could have some days that are face to face and our discussions could be in person verses online.

- I would completely remove/change the lab portion.

- N/A

- None.

6.3) Any further, constructive comments?

- N/A

- None.

- Ok, it's 1:24am. I just finished one of the labs. I can not begin to tell you how much I despise doing these labs. We're reading sections introducing beginning to cloud computing with basic information and then the lab expects me to setup servers via the command prompt like I've navigated that before. It was the 4th attempt on this lab for me that got it completed, I think, because I have no idea if I did it correctly. I'm a sharp guy and I excel at most of the things I study or work on, however, these labs are almost inoperable. If I happen to get an error message I have NO idea how to correct it. Start over. If I accidentally delete too many things in a line, I have NO idea how to undo my changes. Start over. I had to ask the professor if there was something I was missing because of how disconnected these labs feel in comparison to the textbooks. It is so disheartening to re-do something over and over and not know WHY I am not completing it correctly. I now tried to start lab portion 3 and immediately I know the second or first portion is wrong because lab 3 wont work right off the bat. I used abhor earlier and that barely describes my feeling towards these labs. The difficulty is insane, the disconnect is blatant, the text has issues where ctl looks like ct1 or the text in the guide doesn't properly show when I need to space something. I would rather write a few thousand word essay explaining my frustrations and problems with the lab than have to ever do another lab in this course. I'm severely concerned for my grade at this point and progression towards my degree plan.
