2. More Than One Instructor:

2.1) **If your course had more than one instructor,** in the box type the name of the instructor you are assessing. If your course only had one instructor, skip this question.

- Martha Culbreth

6. Open Response:

6.1) What are the strengths of this course?

- I thought the Cengage learning platform was great, The teacher gave great comments very fast, and it didn't seem like it was too much work at one time.

- The professor made herself available for all the students and conducted a 4 p.m. online Zoom to answer questions.

- This class does give great information for people who are beginners with computers, programs, etc.

6.2) What changes would you recommend that would improve this course?

- I honestly think this course is perfect the way it is.

- I would adjust how instructions are worded. I found instructions on some assignments were confusing or hard to understand. I would also add a few more visual examples for assignments for students who need that.

- I would recommend more instructional video/zooms on how to use the computer programs that we are learning. I don't feel that using cengage taught me all I needed to know on being proficient in using these programs.

- Maybe video explanations of the projects. I know Cengage for other classes offers tutorial functions, that is the only thing I would recommend.

6.3) Any further, constructive comments?

- I absolutely loved this class. I have always struggled with online course work but I really feel like this professor helped me to excel in this class.

- I think the group project should be reconsidered on when it's done or not assign any other assignments during that time. I know in my group it was very hard to do the project as well as continue to do the assignment that were due.

- Overall, I enjoyed the material. I thought everything that was taught was taught for a reason. I would highly recommend Professor Culbreth to anyone as she is very nice but also fair.

- The cengage program used in this class is very confusing and hard to navigate. Tutorials through the website are useful but I would add into the syllabus that not all assignments on cengage will be used during the class and maybe a walkthrough by the instructor during the first week of class would help further.
