6. Open Response:

6.1) What are the strengths of this course?

- Instructor was always available when I had a question or needed help. Always answered back in a very timely manner. The zoom recorded meetings were my to go tool's. Watched them several times until I got the project done.

- The course provides students with sample code to help start them out when coding. The mindtap chapter readings are very helpful.

- nothing

6.2) What changes would you recommend that would improve this course?

- Nothing I can think of.

- The course had the tools to be successful. The course was very hard because I am a beginner but having the tools the instructor provided and the eBook was helpful. Maybe some mini Java methods would be helpful. I just think it was difficult for me because I am beginner and it was not something I am familiar with at all.

- just more help

6.3) Any further, constructive comments?

- No further comments.

- help with assignments
