Comments Report

6. Open Response:

- ^{6.1)} What are the strengths of this course?
- Detailed and quick feedback. Assignments are relevant to the field of study. Dr. Maribi provides detailed information in the zoom meetings.
- Online and flexibility
- zoom calls to understand assignment and quick to respond to email
- ^{6.2)} What changes would you recommend that would improve this course?
- Be respectful of students' time when in zoom meetings. Implement MindTap learning material into the lessons.
- I feel that this course should be focused more towards in-person rather than online or at least provide an option for an in-person course.
- In my opinion this course was too comprehensive for it to be an 8-week course. The projects were not structured for beginners or students new to java. I think the project descriptions needed more details and could have been more basic. Unfortunately, there were no tutors available to assist with this class I had to find an external tutor for help. It would be great to offer tutors if this course will only be 8 weeks.

The instructor made himself available and offered Zoom videos which helped some. However, I needed additional help to understand java and break it down so that I could understand it better.

- clear and better instructions for program and better outline of due dates for quizzes.
- ^{6.3)} Any further, constructive comments?
- N/A
