Comments Report

5. Comments

5.1) Your instructor will appreciate any comments you have concerning the course or his/her teaching.

- I think if my professor were to slow down a little when teaching and talk the steps through more it would help, but I know there is time restraints.
- My recommendation is to be more considerate of others' time and how much homework/prerequisite homework you assign. Overall, I have spent time seeking help from the math center but I still felt overwhelmed when it came to homework. I always felt like I could not come to you to ask for assistance as your only response when emailing you for help would be, "refer back to your notes as we covered it there." Overall, I feel as if my grades on my test weren't reflecting the knowledge that I was learning on the homework. It felt very frustrating. As well as the thought of missing class and being docked participation points for being absent even if it was out of my control was terrifying. I feel like making the homework quizzes that much of the participation grade is unfair to those who have kids and are unable to attend classes if they have to stay home with their children. This class was very frustrating and I was always on top of my work, studying with friends, keeping my notes organized, etc.... but it never felt good in this class. I also had to take this course in order to continue my road to my degree so I was not taking this course just to take it either.
- The instructor did explain everything very well, although the instructor gave an overwhelming amount of assignments. Some assignments took me all day just to finish. I understand that more practice gives the student a more of a chance to get better, but it was too much. Especially for a student like me who's math skills aren't the best it made it harder for me to understand and catch up. Other students would tell me the same thing that they were having a hard time with the homework and finishing because it was too much. Other than that I think the instructor did an excellent job on explaining each topic. I liked how detailed she was about her topics, because that helped me a lot.
