6. Open Response:

6.1) What are the strengths of this course?

- Challenging, but good developmental understanding.

- Critical thinking is a big part of this course as well as learning to utilize Microsoft Excel more in depth.

- I have learned how to understand and breakdown data.

- Teamwork

- The assignments are very straightforward and fairly reasonable to complete with the resources provided for the course.

- The course is well organized and Dr. Naser communicated with us clearly.

6.2) What changes would you recommend that would improve this course?

- I would improve the communication within the course. Yes, it is an online course, but I felt like I taught myself throughout the course vs. the professor teaching.

- More instruction or online meetings for the class project. It was quite difficult to complete and more time was spent on trying to figure out how to use excel rather than learning how the statistics applied to healthcare.

- No changes at all

- None

- None.

- There needs to be a mentor for this course. The course is very daunting and more often than not, students have never had to perform any sort of statistical analyses, so a little help from someone who has taken the class prior would be beneficial to the project managers and team members.

- none

6.3) Any further, constructive comments?

- N/A.

- No

- There also needs to be help provided for the course.

- no
