Please feel free to write a lot in the comment box since your feedback is probably the single most important influence on course improvement.

- While working within a group project, my team members were unsure of our instructors gender for some time. We only visually saw our instructor once towards the end of the course. The instructors name seemed it could be a woman or mans name. We went back and forth communicating (he/ she). I assumed she was a female using context clues from some of her discussion posts during the initial introductions. For communication purposes, especially when correspondence is done through email, it would be good to know. Thankfully we just used 'Dr. Gordon' throughout the course when communicating. Maybe we missed it somewhere. One of our team members also had gone to the school to find her office and discovered she was working remotely. These were all very minor things I thought I would mention as it would be helpful to have a better understanding of what and whom your working with initially.
