6. Open Response:

6.1) **What are the strengths of this course?**

- Hands on exercises in learning material instead of just reading. Actually doing an exercise like would be expected in a job within the industry.

- Online

- The case studies and written assignments helped reinforce the learning objectives. I felt prepared in my presentation to give an informed answer on a variety of health IT subject due to what I learned in researching different assignments through the course.

6.2) **What changes would you recommend that would improve this course?**

- More instructor lecture

- Some of the Youtube videos were not available or were difficult to hear.

- The 45-minute weekly meetings

- Updating the video links. several video links provided to help students complete assignments had been taken down or made private so I felt that was a bit disappointing when I was trying to do research to understand an assignment. Overall the readings and case studies adequately covered the subject I just like to have a really good understanding of everything before I start writing.

6.3) **Any further, constructive comments?**

- no (2 Counts)
