6. Open Response:

6.1) What are the strengths of this course?

- I like how the course is divided between learning in the classroom and practicing in the skills labs. It is hard to learn without being able to apply it, and I feel better prepared for my future because of my time in the skills lab.
- I really love this class. Its been my favorite class of the semester. Strength of this course would be how well its set up. The hands on activities have been wonderful.
- The professor answered all questions and followed the syllabus. Also kept everything on track.
- The teacher was always there to answer the questions that we needed and never made us feel that the questions were dumb. She made it interactive where each of us could work with one another.
- What we go over in class normally correlates what we're learning in our other classes.

6.2) What changes would you recommend that would improve this course?

- I don't have anything to add here.
- I feel that having a better presentation on certain skill check-offs would help improve the experience especially if it was well prepared.
- I would recommend that the professors take into consideration the amount of people in the class when scheduling skills check offs. I would also suggest a thorough demonstration for skills checkoffs that all the students can see.
- The power points should be more concise. The power points would average around 130 slides per topic and overloaded too much information for a concept that could be simplified.

6.3) Any further, constructive comments?

- I think that Ms. Pena is a great teacher. She knows what she is talking about and delivers the information in a way that can be interpreted by beginners.
