## Comments Report

### 6. Open Response:

6.1) What are the strengths of this course?

- Good explanation of the concepts and methods using video from the instructor, videos and links provided to other sources etc.
- It was clearly explained when the video was available
- None
- The amount of help and availability of my professor was excellent. She made sure to explain any problems that I missed on assignments in detail and offered help.
- The instructor made videos to better understand the course material and show a how to step by step
- the strengths in this class i believe are that you get videos to help you navigate through the course.

6.2) What changes would you recommend that would improve this course?

- A video needs to be added to assignment 5 because it does not explain the information clearly enough.
- I would recommend Dr. Li going into more details of the lessons. I do not think we need to know the answers to the homework however; providing similar questions and having her work them out so we understand what is needed is ideal.
- It was hard to understand the instructor when she gets excited and speaks fast, nothing you can do about that really. I would ask that she hear out the whole question, that is the only thing she was really bad about hearing out the questions all the way through and just assumed questions.
- Just a little more explanation on what is required from us in explaining the answer.
- No changes - I think if a student really uses the information provided by Dr. Li and watches the supplementary videos, they will do fine. If they try to just work their way through it too quick or not read the lessons, they will get confused and not do well.
- None.

6.3) Any further, constructive comments?

- No.
- On week 5 the zoom videos were not in full. This was the only extremely frustrating week I had. I did not understand at all what was needed and it took me hours to figure it out while being extremely frustrated.
- She was able to take the time to help and that means a lot to us students please continue to do that and not stop
- While she is available for students. She does not understand our questions most of the time and it is hard to get information figured out.
