

Brazosport College

Syllabus for OSH 1301 – Introduction to Safety and Health

Instructor: Om Chawla
Office Phone: 979-230-3444
Alt. Phone: 979-230-3618

Office: L.204B
Email: om.chawla@brazosport.edu
Fax: 979-230-3341

I. COURSE DESCRIPTION:

OSHT 1301 - Introduction to Safety and Health CIP 1507010011

An introduction to the basic concepts of safety and health. This course is intended for students who need to refresh or enhance their understanding of fundamental science and safety and health concepts before taking any other course in the Safety, Health, and Environmental Management program. The course will review fundamental concepts of physics, chemistry, biology, human physiology, occupational illnesses, and injuries and will provide an introduction to workers' compensation, safety, health and environmental management program history and development and the role of the safety professional. **Credit Hours: 3 (3 lecture, 0 lab)**

Samuel Chamberlain

Om Chawla

Gary Hicks

Dr. Mitchell Seal

January 2022

A. Required skill level: College-level reading and writing.

II. COURSE OBJECTIVES

The following course objectives are from the textbook and are aligned with the North American Process Technology Alliance (NAPTA)

Topic Name	Objectives
Course Overview	<ol style="list-style-type: none">1. Explain the necessity of occupational safety regulations.2. Discuss industrial accidents and other events in the process industries that have affected safety, health, and the environment.3. Describe governmental agencies and regulations that address safety, health, and environmental issues:<ul style="list-style-type: none">• Occupational Safety and Health Administration (OSHA)• Environmental Protection Agency (EPA)• Department of Transportation (DOT)• Nuclear Regulatory Commission (NRC)• Department of Homeland Security (DHS)• Maritime Security (MARSEC)• Federal Emergency Management Agency (FEMA).4. Discuss how individuals can have an impact on safety, health, and environmental issues.5. Describe good safety habits and safe work practices:<ul style="list-style-type: none">• Follow all procedures.• Using proper personal protective equipment (PPE)• Attend training and use documentation.• Perform housekeeping and sanitation.• Handle materials properly
Types of Hazards and their Effects	<ol style="list-style-type: none">1. Identify the main types of hazards to health, environment, and safety.2. Explain the various routes of entry that chemical and biological hazards use to enter the human body.3. Describe the short-term and long-term effects that hazards can have on an individual's health and safety4. Describe the short-term and long-term effects that hazards can have on the environment

Recognizing Chemical Hazards	<ol style="list-style-type: none"> 1. Identify the various chemical hazards (gases, liquids, and particulates) found in the process industries and discuss potential effects such chemicals have on safety, health, and the environment. 2. Identify specific categories of hazardous chemicals used in the process industries and describe the potential health and environmental hazards posed by each 3. Explain the purpose and function of labeling systems found in local process industries. 4. Explain the purpose and components of Safety Data Sheets (SDS). 5. Describe the primary governmental regulations relating to chemical hazards (labeling, storage, etc.).
Topic Name	Objectives
Recognizing Biological Hazards	<ol style="list-style-type: none"> 1. Identify potential biological hazards in the process industries and discuss their potential effects on safety, health, and the environment. <ul style="list-style-type: none"> • Micro-organisms (such as viruses and bacteria) • Arthropods (arachnids and insects) • Poisonous snakes • Plant allergens and toxins • Protein allergens from vertebrate animals 2. Describe how blood borne pathogens can affect the human body. 3. Describe governmental regulations and industry guidelines that address biological hazards.
Equipment and Energy Hazards	<ol style="list-style-type: none"> 1. Discuss the equipment and energy hazards posed by certain activities performed in the process industries. <ul style="list-style-type: none"> • Working with moving or rotating equipment • Working with equipment that is pressurized, has extreme temperatures, or emits radiation • Working with energized equipment (powered by electricity or other power source) 2. Describe governmental regulations and industry guidelines that address equipment and energy hazards.
Fire and Explosion Hazards	<ol style="list-style-type: none"> 1. Point out specific physical hazards present in the process industries and explain the potential safety, health, and environmental hazards: <ul style="list-style-type: none"> • Fire • Upper explosive limits (UEL) • Lower explosive limits (LEL) • Boiling Liquid Expanding Vapor explosion (BLEVE)

Fire and Explosion Hazards (cont.)	<ul style="list-style-type: none"> • Explosions • Detonation <ol style="list-style-type: none"> 2. Describe governmental regulations and industry guidelines that address fire and explosion hazards.
Topic Name	Objectives
Pressure, Temperature and Radiation Hazards	<ol style="list-style-type: none"> 1. Recognize specific physical hazards present in the process industries and explain the potential safety, health and environmental hazards posed by this equipment: <ul style="list-style-type: none"> • Vacuum • High pressure • Compressed gases • Pressure vessels (runaway reactions) 2. Recognize the hazards of heat and temperature in the working environment. 3. Explain the effects of ionizing and non-ionizing radiation. 4. Describe governmental regulations and industry guidelines that address pressure, temperature, and radiation hazards.
Hazardous Atmosphere and Respiratory Hazards	<ol style="list-style-type: none"> 1. Describe the effect of hazardous atmospheres on respiration. 2. Name specific hazards associated with hazardous atmospheres, ventilation, and other respiratory-related issues. 3. Describe governmental regulations and industry guidelines that address hazardous atmospheres and respiration hazards.
Working Area and Height Hazards	<ol style="list-style-type: none"> 1. Name specific hazards associated with work areas, such as the following: <ul style="list-style-type: none"> • Working surfaces • Means of egress • Heights • Confined spaces 2. Describe governmental regulations and industry guidelines that address working surfaces, means of egress, height, and confined space hazards.
Noise and Hearing Hazards	<ol style="list-style-type: none"> 1. Identify noise levels and specific hazards associated with noise generated in a process industry environment. 2. Describe how these variables can impact hearing: <ul style="list-style-type: none"> • Length of exposure • Volume of noise 3. Describe governmental regulations and industry guidelines that address noise and hearing protection.

Construction, Maintenance and Tool Hazards	<ol style="list-style-type: none"> 1. Name specific hazards associated with construction and maintenance tasks in a process industry environment. 2. Describe how hand and power tools can be hazards. 3. Describe governmental regulations and industry guidelines that address construction, maintenance, and tool hazards.
Topic Name	Objectives
Vehicle and Transportation Hazards	<ol style="list-style-type: none"> 1. Name specific hazards associated with vehicles and transportation used in the process industry environment: <ul style="list-style-type: none"> • Forklifts • Powered platforms • Cranes • Trucks • Trains • Watercraft • Pipeline • Helicopters • Personal vehicle • Bicycles and carts 2. Describe governmental regulations and industry guidelines that address vehicle and transportation hazards.
Natural Disasters and Inclement Weather	<ol style="list-style-type: none"> 1. Name specific hazards associated with natural disasters that could impact the process industries: <ul style="list-style-type: none"> • Hurricanes • Tornados • Floods, lightning, hail, rainstorms • Extreme temperatures • Earthquakes 2. Describe how emergency preparedness plans address natural disasters.

Topic Name	Objectives
Physical Security and Cybersecurity	<ol style="list-style-type: none"> 1. Identify physical and cybersecurity vulnerabilities in the process industries: <ul style="list-style-type: none"> • Terrorist organizations and hostile nation-states • Insiders • Criminal elements. 2. Describe the nature of threats to physical security and cybersecurity: <ul style="list-style-type: none"> • Terrorist threats and acts • Workplace violence • Criminal acts • Industrial espionage. 3. Describe the activities involved with maintaining physical security in these areas: <ul style="list-style-type: none"> • Access and perimeter • Site security plan • Protecting access badges • Transportation workers' identification credentials (TWIC) operations • Communications • Personnel 4. Describe the tasks associated with protecting electronic information through sound cybersecurity practices, including the following: <ul style="list-style-type: none"> • Password protection • Malicious software or malware. 5. Describe the government regulations that address physical security and cybersecurity.
Recognizing Ergonomic Hazards	<ol style="list-style-type: none"> 1. Name certain activities performed in the process industries and discuss the potential ergonomic hazards posed by these activities: <ul style="list-style-type: none"> • Lifting and handling materials • Working at heights • Working in confined spaces • Using repetitive motions 2. Demonstrate proper lifting techniques. 3. Demonstrate proper ergonomics for repetitive motions. 4. Describe governmental regulations and industry guidelines that address ergonomic hazards.

Topic Name	Objectives
Recognizing Environmental Hazards	<ol style="list-style-type: none"> 1. Identify specific categories of hazardous chemicals used in the process industries. 2. Identify the various factors that can lead to leaks, spills, and releases. 3. Describe the potential dangers of leaks, spills, and releases in the environment and the community. 4. 1 Explain the EPA regulations that impact the process industries.
Introduction to Hazard Controls	<ol style="list-style-type: none"> 1. Describe the three major types of hazard controls: <ul style="list-style-type: none"> • Engineering • Administrative • Personal Protective Equipment (PPE) 2. Discuss why, when, and how these controls are applied.
Engineering Controls: Alarms and Indicator Systems	<ol style="list-style-type: none"> 1. Describe the role of alarms in providing a warning of conditions that can lead to emergencies, leaks, spills, and releases, and discuss the dangers of improper responses or failures of alarms. 2. Identify various engineering controls, specifically alarm and indication systems, used by the process industries to minimize and/or eliminate threats to health, safety, and the environment. <ul style="list-style-type: none"> • Fire Alarms and Detection Systems • Toxic Gas Alarms and Detection Systems • Process Alarms (high level, high pressure, deviation, etc.) • Redundant Alarm and Shutdown Devices • Automatic Shutdown Devices • Interlocks 3. Discuss actions required by process technicians when alarms occur.
Engineering Controls: Process Containment and Process Upset Controls	<ol style="list-style-type: none"> 1. Recognize various engineering controls, specifically process containment, and control systems, used by the process industries to minimize and/or eliminate threats to health, safety, and the environment. 2. Describe various engineering controls, specifically process upset control systems, used by the process industries to minimize and/or eliminate threats to health, safety, and the environment. 3. 19.3 List common process fluids used in the process industries and describe

Topic Name	Objectives
Administrative Controls: Programs and Practices	<ol style="list-style-type: none"> 1. Describe and discuss various administrative controls, used by the process industries, to eliminate and/or minimize threats to safety, health, and environment including housekeeping and permits in auditing. 2. 20.2 Produce a site safety inspection and/or audit to identify potential workplace hazards. 3. 20.3 Complete a safe work observation and provide feedback to coworkers on safe and potentially unsafe work practices. 4. 20.4 Discuss the impact of government regulations and industry organization guidelines.
Permitting Systems	<ol style="list-style-type: none"> 1. Describe the function and purpose of permitting systems found in local plants. 2. 21.2 Use locks, tags, and blinds to isolate a piece of equipment. 3. 21.3 Complete a job safety analysis and complete a safe work permit to ensure the work environment is safe prior to beginning a job. 4. 21.4 Describe government regulations and industry guidelines that address permitting.
Topic Name	Objectives
Personal Protective Equipment and First Aid	<ol style="list-style-type: none"> 1. Describe basic first aid procedures and responses. 2. Discuss the selection, function, and proper use of Personal Protective Equipment (PPE) in the process industries: <ul style="list-style-type: none"> • Respiratory protection • Eye protection • Hearing protection • Head protection • Hand protection • Foot protection • Skin protection 3. Describe the levels of protection PPE. 4. Describe governmental regulations and industry guidelines that address medical and first aid responses and PPE: <ul style="list-style-type: none"> • OSHA 1910 Subpart K: Medical and First Aid • OSHA 1910.132 Personal Protective Equipment (PPE) • OSHA 1910.133 PPE: Eye and Face Protection • OSHA 1910.134 PPE: Respiratory Protection • OSHA 1910.138 PPE: Hand Protection

Topic Name	Objectives
Monitoring Equipment	<ol style="list-style-type: none"> 1. Explain the function and purpose of testing equipment found in local plants: <ul style="list-style-type: none"> • LEL/O₂ meters • Gas detection equipment • Personal monitoring devices (exposure, radiation, noise) • Detector tubes 2. Describe industry guidelines and governmental regulations that address usage and permitting of monitoring equipment.
Fire, Rescue, and Emergency Response	<ol style="list-style-type: none"> 1. 24.1 Explain the function and purpose of fire, rescue, and emergency response equipment typically found in the process industries: <ul style="list-style-type: none"> • Emergency Response • Fires (different types) • Spills • Rescue / retrieval • Escape • Chemical exposure • Gas release 2. Demonstrate the proper selection and use of fire and rescue equipment. 3. 24.3 Demonstrate the correct use of chemical and gas exposure equipment.

III. STUDENT LEARNING OUTCOMES

OUTCOME	METHOD OF ASSESSMENT
Describe the components of a typical plant safety and environmental program and the role of a process technician in relation to safety, health, and the environment; identify the functionality of safety, health, and environmental equipment used.	These outcomes will be assessed by the score on the course exams (one exam per 6 chapters) and, also the final exam
Recognize and identify the various types of Safety, Health and Environmental hazards in a plant environment and discuss the consequences of these hazards.	These outcomes will be assessed by the score on the course exams (one exam per 6 chapters) and, also the final exam
Demonstrate knowledge of the various types of hazard controls (administrative, engineering, personal protective equipment) and discuss methods of applying these controls.	These outcomes will be assessed by the score on the course exams (one exam per 6 chapters) and, also the final exam

OUTCOME	METHOD OF ASSESSMENT
Identify the fourteen elements of PSM (Process Safety Management) and discuss how they work together for the safety of plant personnel.	These outcomes will be assessed by the score on the course exams (one exam per 6 chapters) and, also the final exam
Discuss how to respond to various types of emergencies (fires, spills, vapor releases, natural disasters, etc.).	These outcomes will be assessed by the score on the course exams (one exam per 6 chapters) and, also the final exam
Discuss the vulnerabilities, risks and threats associated with the process industries (terroristic, cybersecurity, workplace violence, suspicious activities, etc.).	These outcomes will be assessed by the score on the course exams (one exam per 6 chapters) and, also the final exam

IV. TEXTBOOK OR COURSE MATERIAL INFORMATION

A. Textbook

1. Safety Health & Environment, NAPTA, 2nd Edition, Pearson Publisher, 2020.
ISBN: 978—0-13-557249-8 (required)

Required course materials are available at the Brazosport College bookstore, on campus or online at <http://brazosport.edu/bookstore/home.html>. Students are not under any obligation to purchase a textbook from the college bookstore. The same textbook is/may also be available from an independent retailer, including an online retailer.

For Distance Education Courses include the following: Contact the Brazosport College Bookstore with a credit card for course materials. Phone: 979-230-3651. Fax: 979-230-3653. Email: bookstore@brazosport.edu. Website: <http://brazosport.edu/bookstore/home.html>

Safety, Health & Environment I is one of the core courses in the Process Technology Degree. The two-year program has been created to train students for careers as Process Technicians in the chemical and refining process industries. This course is a foundation for all of the other courses in the PTAC program.

Safety, Health & Environment I, provides a general overview of the various types of plant hazards, safety and environmental systems and equipment, and regulations under which plants are governed.

**** For Online classes, I am additionally available 30 minutes before each class period and up to 1 hour after each class period via Virtual Classroom (from D2L, Communication --> Virtual Classroom)**

B. Course Outline

This is a sample outline which may vary with individual instructors. It will also vary on whether the course is a summer course or a fall/spring course. Students should contact their instructor of the outline of the course they are taking.

WEEK #	TOPIC
1	Course Overview
2	Hazard Types and Their Effects Recognizing Chemical Hazards
3	Recognizing Biological Hazards Equipment and Energy Hazards
4	Fire and Explosion Hazards
5	Pressure, Temperature, and Radiation Hazards Hazardous Atmospheres and Respiratory Hazards
6	Working Area and Height Hazards Hearing and Noise Hazards
7	Construction, Maintenance, and Tool Hazards Vehicle and Transportation Hazards
8	Natural Disasters and Inclement Weather Physical Security and Cyber Security
9	Recognizing Ergonomic Hazards Recognizing Environmental Hazards
10	Introduction to Hazard Controls
11	Engineering Controls: Alarms and Indicator Systems Engineering Controls: Process Containment and Process Upset Controls
12	Administrative Controls: Programs and Practices Permitting Systems
13	Center for the Advancement of Process Technology 4/9/2007 4
14	Personal Protective Equipment and First Aid Monitoring Equipment
15	Fire, Rescue, and Emergency Response Equipment
16	Final

Important Semester Dates:

Last Day to Withdraw from Classes– Check BC Academic Calendar at
<http://catalog.brazosport.edu/index.php>

Office Hours:

For fulltime faculty, office hours may change from semester to semester. Current faculty office hours are included on the syllabus, see link: <https://brazosport.edu/faculty-and-staff/resources/course-syllabi-instructor-information/>

For an adjunct faculty, no office hours are required, and they are not assigned an office. To set up an appointment with an adjunct, contact the instructor as per the email address on the syllabus, see link: <https://brazosport.edu/faculty-and-staff/resources/course-syllabi-instructor-information/>

C. Computer or tablet with webcam that is compatible with Respondus Lockdown Browser/Monitor which is required for major exams.

- D. Note: If you cannot obtain a webcam, then you will need to take your major exams on campus at Learning Services. An appointment will be required (must call ahead of time, not the day of exam)

E. Virtual Campus/D2L: (for Online and Hybrid courses only)

Knowing how to use Virtual Campus (D2L) is an **absolute must** to succeed in this course. Locations of technical support information on the Virtual Campus are on the school website, the Virtual Campus login page, on the My Home page, and Course Home areas of each online course.

These areas contain links to:

- technical support
- manuals & videos
- orientation to online courses
- distance learning website

<https://brazosport.edu/programs/distance-learning-online-instruction/student-manuals-tutorials/> In addition, the Distance Learning department conducts webinars and on campus training for using D2L, but you must sign-up ahead of time. Here is a link to sign-up, but call them if there is a problem with the link:

<https://form.jotform.com/mcconnel/rsvpvirtualtour>

D2L can be accessed through many types of devices, however, Respondus Lockdown Browser will not work on a smart phone. See system requirements on this link:

<https://web.respondus.com/he/lockdownbrowser/resources/>

Only certain file formats can be opened with D2L. Apple file extensions will not work, but can be converted (file conversion instructions can be found at this link

<https://support.apple.com/en-us/HT202227>) . These are the file extensions that can be submitted:

Microsoft Word™ (DOC and DOCX)

- Corel WordPerfect®
- HTML
- Adobe PostScript®
- Plain text (TXT)
- Rich Text Format (RTF)
- Portable Document Format (PDF)
- Microsoft PowerPoint (PPT, PPTX, and PPS)
- Hangul (HWP)

1. Check “Contents” in D2L to keep up with weekly assignments starting your first week.
2. Deadlines are not flexible. There are only negotiable due to emergencies/event out of your control, and with written excuse from employer, doctor, etc. Do not wait until the last day to start your homework or you will inevitably have problems to prevent your completion.

Lack of user knowledge resulting in technical difficulties is not an allowable excuse. Make sure and ensure you know how to upload assignments and do quizzes during the week when the HELP DESK is available.

3. You can work ahead on any assignment or quiz except for the final exam.
4. Students must use D2L to keep up with announcements, assignments, etc. Success can occur if you logon more than weekly and complete all homework, quizzes and exams by deadlines.
5. Several elements of D2L may be used including Dropbox, Discussions, Contents, Quizzes and more.
6. Weekly assignments and quizzes should all appear in “Contents”. CONTENT is a key area for you to check. Note: do not depend on Calendar notifications
7. See Communications section in syllabus concerning D2L email

F. Weekly Homework (as assigned)

Homework assignments are due Noon of the following week. There are no makeup assignments, any missed assignments are rated as a zero. You may work ahead of schedule if you desire. Homework assignments are typically in three categories:

1. D2L HW (Homework) quizzes are taken from the Checking Your Knowledge (CYK) questions at the end of each chapter in the textbook. *Your answers are required to come from the textbook and not some other resource such as the internet.* Review these questions at the end of the chapter before taking the quiz to make sure you are prepared. These quizzes are not timed, and you may use your texts, notes, etc. You will only get ONE submission, so make sure and carefully check your answers before submitting. The quizzes are graded automatically and posted to the online grade book.
2. Discussion Posts - These are assignments which require you to post in a discussion board on a topic and reply to other posts on the topic. One example is the Weekly Safety Presentation power points which have topics assigned to each student. Do not wait until the last minute to do these or you will likely not be able to formulate thoughtful posts or replies and will not receive full credit. These will be graded (manually) after the submission deadline and grades will be posted to the online grade book.
3. Dropbox submissions - Submit the assignment into Dropbox in a compatible format document (created and saved on your PC or flashdrive) with appropriate filename. Make sure you check the file to ensure it opens properly (from your hard drive) before uploading to drop box. These will be graded (manually) after the submission deadline and grades will be posted to the online grade book. Please watch for feedback on the assignment that will show in notifications. Also, make sure you receive notification that your assignment was submitted.
4. Also, your homework must be your OWN work. Sharing homework answers/assignments is considered “cheating” and in violation of the academic honesty policy. Violators will be reported and at risk of failing the course.

G. Weekly Quizzes are also due weekly per schedule and can be accessed by Content tab or Assessment/Quizzes (see top menu bar). There are no makeup quizzes, any missed items are rated as a zero.

The quizzes are intended to be an assessment of what you have learned, so they are timed with intent of **not** being open book. You can take these ahead of time if desired. Each quiz can be taken only once and is timed. They are due every week by Noon of the following week. Quizzes are automatically graded in D2L but may include manual grading of written response questions. You can review scores upon submission or in Assessment/Grades section of D2L. Quizzes are mostly taken from the homework assigned weekly. Note: Make sure you get confirmation that your quiz was submitted properly. No excuses will be accepted because you later find out the quiz did not get saved and submitted.

Past quizzes can be reviewed by going on D2L to Assessments/your name Progress/Quizzes then go to the quiz you want to see and click on Details, then select Attempt

H. Major Exams

1. Are assigned per the schedule in Content section and the Calendar and are the following week by noon.
2. They are designed to be closed book.
3. There are no makeup exams, any missed items are rated as a zero.
4. These are D2L "Quizzes" and can only be taken using Respondus Lockdown Browser/Monitor. A webcam is required. You must download the Respondus software onto your home computer so I would advise doing this right away in case you need to get the Help Desk involved. A practice Respondus exam is provided to ensure you get the system working before the first major exam is due. For information on Respondus and the link to software download:
<https://brazosport.edu/students/for-students/bc-online/respondus-lockdown-browser/>
Note: make sure you review system requirements for your computer to support this system.
5. Exams are timed and automatically graded in D2L but will require manual grading for written response questions. You only get ONE submission so make sure and carefully check your answers before submitting. You can review scores upon submission or in the online grade book of D2L. Note: Make sure you get confirmation that your quiz was submitted properly. No excuses will be accepted because you later find out the quiz did not get saved and submitted.
6. You may work ahead of schedule if you desire.
7. Past quizzes can be reviewed – see instructions under Weekly Quizzes

H. Final Exam The final exam is comprehensive and closed textbook. Respondus Lockdown Browser/Monitor is required for this exam. The exam is timed and automatically graded in D2L except for written response questions that require manual grading. You only get ONE submission so make sure and carefully check your answers before submitting. There is no makeup final exam, any missed items are rated as a zero. You can review scores in the online grade book of D2L once manual grading of written responses is completed.

I. Communications with Instructor

1. There may be Virtual Classroom sessions scheduled and can be found in Content section of D2L
2. Check your D2L email multiple times per week.
3. Please send any emails to me through D2L **only!** The Brazosport policy is for students nor faculty to communicate via personal email or texting unless urgent/emergency. **I will only respond to emails via D2L.**
4. Make sure and identify which course and section you are in because I instruct more than one course/section and need this information to locate your information online.
5. I would highly recommend forwarding your D2L emails to an email account that you check regularly (such as your personal email). Instructions for this are on D2L along with other useful resource. *But please note that you cannot reply to these forwarded emails from your personal email. You will have to log in to D2L to reply using the D2L email.*
6. I would also recommend using the D2L notifications feature to remind you of upcoming assignments and other available topics.

V. STUDENTS WITH DISABILITIES

Brazosport College is committed to providing equal education opportunities to every student. BC offers services for individuals with special needs and capabilities including counseling, tutoring, equipment, and software to assist students with special needs. For student to receive any accommodation, documentation must be completed in the Office of Disability Services. Please contact Phil Robertson, Special Populations Counselor at 979-230-3236 for further information.

VI. TITLE IX STATEMENT

Brazosport College faculty and staff are committed to supporting students and upholding the College District's non-discrimination policy. Under Title IX and Brazosport College's policy FFDA (Local), discrimination based on sex, gender, sexual orientation, gender identity, and gender expression is prohibited. If you experience an incident of discrimination, we encourage you to report it. While you may talk to a faculty or staff member at BC, please understand that they are "Responsible Employees" and must report what you tell them to college officials. You can also contact the Title IX Coordinators directly by using the contact information below. Additional information is found on the Sexual Misconduct webpage at www.brazosport.edu/sexualmisconduct.

VII. ACADEMIC HONESTY

Brazosport College assumes that students eligible to perform on the college level are familiar with the ordinary rules governing proper conduct including academic honesty. The principle of academic honesty is that all work presented by you is yours alone. Academic dishonesty including, but not limited to, cheating, plagiarism, and collusion shall be treated appropriately.

Academic dishonesty violates both the policies of this course and the Student Code of Conduct. In this class, any occurrence of academic dishonesty will be referred to the Dean of Student Services for prompt adjudication, and may, at a minimum, result in F, in this course. Sanctions may be imposed beyond your grade in this course by the Dean of Student Services. Please refer to the Brazosport College Student Guide for more information. This is available online at <http://brazosport.edu/students/for-students/student-services/>.

VIII. ATTENDANCE AND WITHDRAWAL POLICIES

Class attendance contributes to your final grade, but you must attend class to successfully complete the course. If you are unable to complete this course, you must complete and submit a withdrawal form with the registrar's office. If the student decides to drop out of the class, it is the responsibility of the student to initiate a withdrawal before the withdrawal deadline in order to get a "W" on their transcript. If this is not done the student will receive a grade based on test grades and class grades earned during their attendance and absence (i.e., zeros on all missed materials, exams, skills tests, and final exam).

IX. COURSE REQUIREMENTS AND GRADING POLICY TESTING MAKE-UP POLICY

The final grade will be based on the following:

A. Grading:

Attendance/class participation	25 %
Exams + Final	25%
Quizzes/Hybrid Computer exercises	25%
Class Exercises	<u>25%</u>
TOTAL:	100 %

Grades are assigned as follows:

Grade	Final Average
A	90-100
B	80-89
C	70-79
D	60-69
F	Below 60

X. STUDENT CONDUCT STATEMENT

Students are expected to be aware of and follow the Brazosport College Student Code of Conduct. Students have violated the Code if they "fail to comply with any lawful directions, verbal or written, of any official at BC." Lawful directions include precautions and requirements taken to prevent the spread of COVID-19 at Brazosport College. Students who do not follow safety requirements, including the wearing of a mask, may be removed from class by their instructor and referred to the Dean of Student Services.

XI. COVID-19 STATEMENT

At Brazosport College, all of us, including faculty, staff, and students, share a common goal this spring semester, to keep our classes running in the safest manner possible and avoid any disruption to your progress in achieving your educational and career goals. To that end, we ask and encourage you to conduct yourself in the following manner while on campus this semester:

- Every day, perform a self-health check prior to coming to campus and stay home if sick.

- To the greatest extent possible, maintain your distance between you and other students, faculty, and staff while on campus.
- Wear a properly fitted face covering over your mouth and nose while indoors on campus. If you do not have a mask, they will be available to you in all classrooms this spring.
- Practice good hygiene, washing your hands regularly and/or using hand sanitizer.
- The most effective way to protect yourself from Covid-19 is through vaccination. The vaccine is readily available and at no cost to you. Vaccine information and availability can be found at <https://brazosport.edu/coronavirus/vaccine/>.

If at any time this semester you begin to experience Covid symptoms, or if you are exposed to someone who has tested positive for Covid-19, please take the following steps:

- Stay home if you're feeling sick and minimize your contact with others.
- Alert the College by completing the Covid-19 Exposure Report Form online at <https://brazosport.edu/coronavirus/report/>. Be sure to provide accurate contact information, including a working phone number that you will answer.
- After submitting the report, you will be promptly contacted by a member of our Rapid Response Team, who will ask you some specific questions about your situation and provide you with guidance moving forward.
- If it is determined that you should not come to class, your instructor will be notified. **Please know that your instructor will consider course adjustments and potential make-up work only if your case has been reported to Brazosport College, and they've been notified by our response team.** Your instructor will work with you to determine how to manage any make-up work.

The Community Health Network (CHN) Clinic at Brazosport College is located in BC Central B-Wing. While walk-ins are available, your visit will be easier if you pre-register by creating an account at www.mychn.org. In addition to providing health and behavioral services, CHN also provides COVID vaccinations and testing. All insurance is accepted, and healthcare is provided on a sliding scale including no cost for those who need it.

Throughout the semester, please regularly check the College's Covid-19 information page at <https://brazosport.edu/coronavirus/>, where the latest updates and guidelines will be posted. As members of the BC community, all of us share a responsibility to each other to be as safe as possible.

XII. CAMPUS CLOSURE STATEMENT

Brazosport College is committed to the health and safety of all students, staff, and faculty and adheres to all federal and state guidelines. The College intends to stay open for the duration of the semester and provide access to classes and support services on campus in the safest way possible. The College will also comply with lawful orders given by applicable authorities, including the Governor of Texas, up to and including campus closure. It is possible that on campus activities may be moved online and/or postpone if such orders are given.

XIII. STUDENT RESPONSIBILITIES

Students are expected to fully participate in this course. The following criteria are intended to assist you in being successful in this course:

1. Understand the syllabus requirements
2. Use appropriate time management skills
3. Communicate with the instructor
4. Complete course work on time, and
5. Utilize online components (such as Desire2Learn) as required.

a. Class attendance

Much of the learning occurs in the classroom setting and cannot be made up by reading the textbook. Therefore, class participation is essential to your learning and attendance is taken.

b. Homework

As a standing homework assignment, students should review the scheduled sections of the textbook before coming to class and prepare questions for class discussion. Students should again review the scheduled section following the class (review forward, read, review back)

c. Class participation

Participation grade is based on the quality (not frequency) of your contribution. Those receiving high grades in class participation will be those who:

- Are prepared for class
- Arrive for class on time
- Have excellent attendance
- Make comments and ask questions that significantly contribute to the learning environment of the class
- Participate in class activities and demonstrations.

d. Attention in class

Unless allowed by the instructor, the use of cell phones, classroom or personal computers, or other electronic communication is not permitted. Personal conversations and other distractions are not permitted, and may result in disciplinary action, including a reduction in class grade. Students who take notes on electronic media, or who have an urgent need to remain in contact, should discuss their situations with the instructor.

XIV. OTHER STUDENT SERVICES INFORMATION

Information about the Library is available at <http://brazosport.edu/students/for-students/places-services/library/about-the-library/> or by calling 979-230-3310.
